PROFESSIONAL SUMMARY

IT infrastructure and networking professional with 12+ years of experience designing, deploying, and operating large-scale IP networks, security systems, and cloud environments for global enterprises. Proven track record leading multi-country technical teams, standardizing operations across hundreds of sites, and delivering resilient, secure, and scalable infrastructure. Adaptable fast learner with a strong focus on automation and continuous improvement.

CORE SKILLS

Networking & Security	Switching, Routing, Firewall, Wireless, VPN, BGP, OSPF, Network Troubleshooting & Maintenance
Vendors & Platforms	Cisco, Aruba, Fortinet, Ruckus
Cloud & Automation	AWS, Azure, Cloud Networking, Terraform, Ansible, Python, Network Automation, Scripting
Monitoring & Operations	Zabbix, Grafana, SolarWinds, Logging & Monitoring, Backups, System Upgrades, DNS, Server Management
Leadership	Project Management, Team Leadership, Communication, Problem Solving, Adaptability, Critical Thinking

PROFESSIONAL EXPERIENCE

Network Administrator

Nov 2024 – Present

Emmi Roth USA · Stoughton, WI, United States

- Manage, plan, renew, and operate network infrastructure across multiple cheese-manufacturing and operational facilities.
- Lead WAN/LAN resiliency initiatives to strengthen uptime and eliminate single points of failure.
- Design and implement an NMS platform to support full lifecycle network operations, monitoring, and configuration management.

Network Technical Lead

Nov 2020 – Dec 2023

Mercado Libre Colombia · Bogotá, Colombia

Led network infrastructure architecture, planning, and operations for the largest e-commerce platform in Latin America, serving as technical lead for Argentina, Chile, and Colombia while supporting operations in Mexico and Brazil.

- Directed connectivity, security, and multi-cloud integration strategy across 500+ warehouses and facilities (10 m² "nano" sites to 150,000 m² distribution centers), achieving 100% uptime at most sites against a 99.998% SLA target.
- Designed and deployed network infrastructure for two major fulfillment centers (100,000 m² and 50,000 m²), including 500+ wireless access points, 150 network switches, and 30 IDFs, using a highly redundant architecture.
- Standardized multi-vendor network switch configurations, improving consistency, compliance, and operational efficiency region-wide.

- Spearheaded a centralized LAN/WLAN/firewall management platform, enabling unified monitoring, control, and lifecycle management of network and security infrastructure.
- Redesigned multi-cloud remote connectivity (AWS, GCP, Azure, colocation), providing centralized, high-availability, private access for all Latam operations.
- Built a vendor-agnostic, cloud-based configuration backup platform integrated with NetBox (source of truth), automating backup, versioning, and recovery.
- Engineered a cost-effective "nano site" network architecture for small-scale locations, maintaining enterprise-grade performance on a reduced budget.

Technology Specialist

Apr 2017 – Nov 2020

BT Latam (now Sencinet) · Bogotá, Colombia

- Managed infrastructure operations for Tier III/IV data centers in Colombia, focused on high-speed networking and colocation services.
- Administered firewalls, physical/virtual servers, storage systems, operating systems, and DNS services supporting regional IT infrastructure.

Senior Network Engineer

Nov 2015 – Apr 2017

RCN TV · Bogotá, Colombia

- Managed IP infrastructure (networks, firewalls, servers, storage, and applications) supporting technical broadcasting operations for a leading Colombian TV network.
- Led high-speed switching, IT/OT systems integration, and storage projects supporting video broadcasting, recording, and streaming services.
- Implemented server and infrastructure virtualization to improve reliability and scalability of broadcast services.

Network Engineer

Jun 2012 – Oct 2015

Fanalca S.A. · Cali, Colombia

- Deployed and administered the data network platform (switches and routers) for Fanalca S.A. and affiliated companies.
- Managed perimeter security, including firewalls, VPN concentrators, and content inspection systems.
- Administered telephony systems supporting corporate operations.

EDUCATION

MSc Business for IT (MBIT), Computer Science

Universidad de los Andes, Bogotá, Colombia · Aug 2018 – Nov 2020

Electronic Engineer

Pontificia Universidad Javeriana, Cali, Colombia · Jul 2002 – Mar 2009

CERTIFICATIONS

Aruba Certified Mobility – Associate (ACMA)
